COUNTY OF KENDALL, ILLINOIS
Health & Environment Committee
County Office Building
County Board Room 210

Monday, August 19, 2019 – 8:30 a.m.
MEETING AGENDA

1. Call to Order

2. Roll Call: Judy Gilmour (Chair), Robyn Vickers (Vice Chair), Elizabeth Flowers, Scott Gengler, Tony Giles

3. Approval of Agenda

4. Approval of Minutes from July 15 2019

5. Status Reports

☐ Board of Health
☐ Health Department
☐ Soil & Water
☐ Water Related Groups
☐ Other Reports

6. Old Business

7. New Business

   ➢ Review of Energy Efficiency Ideas for County Departments

8. Chairman’s Report

9. Public Comment

10. Questions from the Media

11. Action Items for the County Board

12. Executive Session

13. Adjournment

If special accommodations or arrangements are needed to attend this County meeting, please contact the Administration Department at 630-553-4171, a minimum of 24-hours prior to the meeting time.
CALL TO ORDER
The meeting was called to order by Chair Judy Gilmour at 8:35 a.m.

OTHERS PRESENT: Meagan Briganti, GIS Coordinator, Steve Curatti, Kendall County Health Department, Ashley Hunt, Assistant Director of Environmental Health

APPROVAL OF AGENDA – Member Vickers made a motion to approve the agenda, second by Member Gengler. With three members present in agreement, the motion carried.

APPROVAL OF MEETING MINUTES – Member Vickers made a motion to approve the meeting minutes from June 17, 2019, second by Member Gengler. With three members present voting aye, the motion carried.

STATUS REPORTS

- **Board of Health** – Member Giles was absent, however Steve Curatti noted the next meeting would be on July 16th, tomorrow evening.

- **Health Department** – Steve Curatti introduced Assistant Environmental Health Director Ashley Hunt who reviewed food safety regulations. Ms. Hunt noted that the Department is not only involved with restaurants but with temporary permits for festivals and special events. Sanitarians are also involved during the construction process for restaurants.

  Mr. Curatti updated the committee on several other projects. The Department is working with a few School Districts to do on-site vaccination clinics. There is also a fresh produce voucher project. Finally, there is a deer tick, lyme disease program that the Department is very proud of as it's only 1 of 9 programs nationwide among Health Departments.
Kendall County Soil and Water District – Chair Gilmour reported that staff is at training and conferences. They will have a booth at the Kendall County Fair.

Water Related Groups – No Report

708 Mental Health Board – No Report

OLD BUSINESS – None

NEW BUSINESS – None

Energy Efficiency Ideas for County Departments – Chair Gilmour lead the discussion sustainable efforts the County could pursue. There are many ideas listed in the packet and the County is doing some of them. Consultation is needed with Facilities Management. Member Vickers noted that this discussion began with the amount of water bottles being used by the County Board. The idea is to get reusable water bottles or stainless steel mugs and get a water cooler. Member Gengler noted this is something he has seen done before. Chair Gilmour reviewed the list and noted some things the County is already doing. The consensus was to further review the list, check with Facilities Management and return next month with proposals for items to implement.

CHAIRMAN’S REPORT – Chair Gilmour noted that the Solid Waste Committee will be meeting August 27th. Once the Solid Waste Plan is complete it will go to the Board of Health, the State and the County Board for approval.

PUBLIC COMMENT – None

ITEMS FOR COMMITTEE OF THE WHOLE – None

COUNTY BOARD ACTION ITEMS – None

EXECUTIVE SESSION – Not Needed

ADJOURNMENT – Member Vickers made a motion to adjourn the meeting, second by Member Gengler. With three members present voting aye, the meeting was adlourned at 9:33am.

Respectfully Submitted,
Mera Johnson
Risk Management & Compliance Coordinator
Kendall County Health Department
Making a Difference

Providing Vaccine Access
to Prevent Diseases

Presented by: Terri Olson RN BSN
Director of Community Health Services
Date: 8/19/19
Global Facts

Vaccine Hesitancy

- Vaccine hesitancy was named a top 10 global health threat by the World Health Organization this year. By this April, measles cases had risen 300%. In its decision to call vaccine hesitancy a global health threat, the WHO attributed the virus’s rise, in part, to people declining or delaying vaccines despite their availability.

Measles Outbreak

- Measles Cases in 2019. From January 1 to August 8, 2019, 1,182, individual cases of measles have been confirmed in 30 states. This is an increase of 10 cases from the previous week. This is the greatest number of cases reported in the U.S. since 1992 and since measles was declared eliminated in 2000. Measles can cause serious complications.
Hepatitis A Outbreak in Illinois: 2018-to-date

The Illinois Department of Public Health (IDPH) declared a statewide community outbreak in December 2018 after observing an increase in person-to-person transmitted Hepatitis A cases. As of August 14, 2019, IDPH is reporting a Hepatitis A outbreak comprised of 150 confirmed cases that are not associated with international travel and are not foodborne related. Several of these cases are among individuals at high risk for infection—including men who have sex with men (MSM), persons experiencing homelessness, persons who use drugs and/or persons who are currently or were recently incarcerated. The statewide community outbreak is spread through person-to-person contact.
Influenza

Influenza (flu) is a contagious respiratory illness caused by influenza virus. It can cause mild to severe illness. Serious outcomes of flu infection can result in hospitalization or death. Some people, such as older people, young children, and people with certain health conditions, are at high risk of serious flu complications. There are two main types of influenza (flu) virus: Types A and B. The influenza A and B viruses that routinely spread in people (human influenza viruses) are responsible for seasonal flu epidemics each year. The best way to prevent flu is by getting vaccinated each year.

In 2017-2018 was a high severity flu season with record breaking levels of influenza-like illness and hospitalization rates. CDC reported 176 flu-related deaths in children through June 30th. This set the record for the highest number of flu-related deaths in children reported during a single flu season. Approximately 80% of these deaths occurred in children who had not received a flu vaccination during that season.
Kendall County Community Health Services....

Making a difference through community collaborations.

February 2019- to date:

Hepatitis A:Section 317 program- (Federal funded)
Provided 42 injections thus far for high risk individuals such as the incarcerated, clients with drug issues and staff who work within the high risk area’s. CHS plans to continue to reach out to Pads and Physicians who may treat high risk individuals without insurance.

Vaccines for Children Offsite clinics: Section 317- (Federal funded)
(A child is eligible for the VFC Program if he or she is younger than 19 years of age and is one of the following: Medicaid-eligible, Uninsured, Underinsured, American Indian or Alaska Native)- Title 19.
Provided 28 vaccines, 24 School Physicals and scheduled over 80 back to school shots during the 3 day collaboration with three High Schools in Kendall County (Oswego, Oswego East and Plano High School) to provide direct access to vaccines. We also scheduled 20 extra Back To School clinics from April to October 2019. In addition, we have applied for the CHIP program (Title 21 children) through the state.

Assisted with collaboration efforts to assist Private Pay clients through Pharmacies within the county and school district.

Media outreach: WSPY, The Reporter, Facebook, and Twitter. In addition, our own web page and quarterly news letter.

Section 317 of the Public Health Service Act authorizes the federal purchase of vaccines to vaccinate children, adolescents, and adults. Over its 50 year history, Section 317-purchased vaccine has been directed towards meeting the needs of priority populations; most recently this has included underinsured children not eligible for VFC, and uninsured adults.
Section 317 discretionary funding also supports immunization program operations at the local, state, and national levels.
Vaccines for Children

The Vaccines For Children (VFC) program is a federally funded program that provides vaccines at no cost to children who might not otherwise be vaccinated because of inability to pay. CDC buys vaccines at a discount and distributes them to grantees—i.e., state health departments and certain local and territorial public health agencies—which in turn distribute them at no charge to those private physicians’ offices and public health clinics registered as VFC providers. Children who are eligible for VFC vaccines are entitled to receive those vaccines recommended by the Advisory Committee on Immunization Practices (ACIP).

The VFC program was created by the Omnibus Budget Reconciliation Act of 1993 and is required to be a new entitlement of each state’s Medicaid plan under section 1928 of the Social Security Act. The program was officially implemented in October 1994 and serves eligible children in all U.S. states, as well as the Commonwealth of Puerto Rico, the U.S. Virgin Islands, American Samoa, Guam, and the Commonwealth of the Northern Mariana Islands.

A child is eligible for the VFC Program if he or she is younger than 19 years of age and is one of the following:

- Medicaid-eligible
- Uninsured
- Underinsured American Indian or Alaska Native

Children whose health insurance covers the cost of vaccinations are not eligible for VFC vaccines, even when a claim for the cost of the vaccine and its administration would be denied for payment by the insurance carrier because the plan’s deductible had not been met.
Important State of Illinois Health Requirements for the 2019-2020 School Year

Physical examination and Immunizations requirements MUST be on file prior to the first day of attendance.

Requirements by Grade Level:

Preschool Students:
- Physical Exam (Parents please complete the Health History portion, sign and date)
- Complete updated Immunization Record signed and stamped by a doctor

Kindergarten Students (K)
- Physical Exam (Parents please complete the Health History portion, sign and date)
- Complete Updated Immunization Record signed or stamped by a doctor
- Dental Exam on Illinois Form dated between November, 2018 - May 15, 2020
- Eye Exam on Illinois Form completed by October 15 of the current school year

Second Grade Students (2nd)
- Dental Exam on Illinois Form dated between November, 2018 - May 15, 2020

Sixth Grade Students (6th)
- Physical Exam (Sports Physical not acceptable) (Parents please complete the Health History portion, sign and date)
- Complete Updated Immunization Record signed and stamped by a doctor
- Dental Exam on Illinois Form dated between November, 2018 - May 15, 2020

Ninth Grade Students (9th)
- Physical Exam (Sports Physical not acceptable) (Parents please complete the Health History portion, sign and date)
- Complete updated Immunization Record signed and stamped by a doctor
- Dental Exam on Illinois Form dated between November, 2018 - May 15, 2020

Twelfth Grade Students (12th)
- Complete Immunization Record signed and stamped by a doctor, showing two doses of the Meningococcal vaccine with the 1st dose being on or after the 11th birthday & second dose on or after the 16th birthday UNLESS the first dose was administered after the age 16 years then one dose is required.

Religious/Medical Exemptions: If your child does not receive Immunizations for religious reasons, a parent and health care provider must complete the "Illinois Certificate of Religious Exemption to Required Immunizations and/or Examinations" form prior to the first day of school. This form may not be used for personal or philosophical reasons. Illinois does not allow for such exemptions.

Sports Physicals: If your child will be trying out for any sport (including intramural), they must have a sports physical on file prior to the season’s first practice. Incoming 6th and 9th grade may use a school physical in lieu of a sports physical, however a sports physical CANNOT be accepted as proof of a physical examination for mandated physicals. Sports physicals are valid for 395 calendar days from the date the physical was issued.

Notes:
Students attending ungraded school programs must comply in accordance with grade equivalent.

Within the Advisory Committee on Immunization Practices (ACIP) recommendations, vaccine doses given up to four days before minimum interval or age can be counted as valid. However, this does not apply to intervals between live vaccines. Live vaccines shall not be given fewer than 28 days after receipt of a prior live vaccine.
