ITEMS OF BUSINESS

Discussion of Resolution Repealing Resolution 2015-31 and Adopting a New Amended Fee Schedule for the Kendall County Circuit Court Clerk - Member Prochaska stated that this resolution would correct the jury fees that we set in accordance with the Illinois Public and 98-1132 which increased the jury fee schedule to $25 for the first day and $50 for each additional day of jury duty, which was found unconstitutional by the Illinois Supreme Court, because it also reduced the number of civil jurors from 12 to 6. Mr. Prochaska stated that since there was no severability clause throughout the entirety of the act, this resolution would repeal our previous fee schedule and adopt a new Amended Fee Schedule that complies with current law.

ASA Johnson stated that this must be done by the County pursuant to the Illinois Supreme Court decision that the law was ruled unconstitutional, so with respect to those fees this resolution has to be amended to reinstate what the fee schedule was prior to the resolution from last year increasing the fees and lowering the number of jurors.

Discussion on the new fee schedule that the Circuit Clerk charges, and what the juror fees will be. State’s Attorney Eric Weis said that his office would research the juror fee issue prior to the County board meeting on Tuesday.

The Illinois General Assembly enacted 50 ILCS 515/1 which establishes the basis for energy efficiency in state and local government buildings. This bill authorizes guaranteed energy savings performance contracting, which can include private sector financing to fund these projects. The purpose of this fact sheet is to communicate key legislative requirements for Energy Savings Performance Contracts (ESPC). This bill authorizes a program for achieving energy, operational and capital cost avoidance savings in state and local government buildings through ESPCs. The 50 ILCS 515/1 Legislation allows institutions to:

- Avoid using money from capital and operating budgets to address building needs
- Make project financing exempt from net allowed indebtedness and avoid future budgeting issues
- Funding flexibility, allowing for installment payments vs. necessity to pay for upgrades out of a single year’s budget

**Guaranteed project cost – NO CHANGE ORDERS**

- **Guaranteed savings**
- **Guaranteed equipment performance**
- Verification of annual savings through a monitoring program
- Make building improvements when capital dollars are not available
- Update aging equipment with newer, more efficient products
- Reduce energy costs without sacrificing service
- Reduce maintenance costs
- Single point of accountability
- Ongoing operational support
The purpose of this feasibility study is to identify projects that will significantly reduce owning and operating costs for Kendall County. This energy conservation program is the funding vehicle which allows you to use guaranteed savings from the counties maintenance and operations budget (utilities) as capital to fund needed upgrades and modernizations to your infrastructure, and is financed over a specified period of time.

This program is designed to be budget neutral, or better, and create a positive cash flow that improves the financial performance for Kendall County. Leopardo can guarantee that cost avoidance (utility and operations expenses) will meet or exceed annual payments to cover all project costs over an agreed debt service period, or Leopardo pays the difference.

A team of experts from Leopardo worked with county personnel to conduct a utility and/or field audit at the following locations:

- Animal Control
- Courthouse
- Health & Human Services
- Historic Courthouse
- County Owned Street Lights
- County Office Building
- Facilities Management & Coroner Building
- Highway Department
- Public Safety Center
- Fleet Services
**GUARANTEED SAVINGS PROGRAM**

**ENERGY SAVINGS** – Reduction in utility expenditures (electric, gas and water) due to any construction, improvement, repair, or betterment of a building that is intended to reduce energy consumption; or any equipment, fixture, or furnishing to be added to or used in a building that will be a cost effective energy related project that is intended to reduce energy consumption.

**OPERATIONAL / MAINTENANCE SAVINGS** – Reduction in expenditures associated with operating and maintaining a building’s heat, ventilation, cooling, lighting, plumbing, water heating, electrical, automation controls, and fleet services.

**BILLABLE REVENUE INCREASES** – Installing automated, electronic, or remotely controlled systems or measures that improve accuracy of billable revenue generating systems and reduce direct personnel costs.

**FUEL & POWER IMPROVEMENTS** – Alternative fuels include gaseous fuels such as hydrogen, natural gas, and propane. These fuels may be used in a dedicated system that burns a single fuel, or in a mixed system with other fuels including traditional gasoline or diesel, such as in hybrid electric or flexible fuel vehicles.

**CAPITAL COST AVOIDANCE SAVINGS** – Reduction in expenses related to energy and water consuming equipment. These energy-related cost savings can result from avoided expenditures for operations, maintenance, equipment repair, or equipment replacement due to the ESPC project. This includes capital funds for projects (e.g., equipment replacement) that, because of the ESPC project, will not be necessary. Sources of Capital Cost Avoidance Savings include:

- Avoided renovation, renewal, or repair costs as a result of replacing old and unreliable equipment
- Avoided current or planned capital expense
- Transfer of responsibility for O&M and/or equipment repair and replacement (R&R) to Leopardo

Why now?

To reduce Kendall County's operating costs and ensure the replacement of the heating and air conditioning system at the Public Safety Center will be completed before summer.

How will the cost of the project be paid for?

By lowering the budgeted Natural Gas, Electric and Fleet Fuel cost.

Are the projected savings guaranteed?

Yes. The winning bidder must guarantee the project savings or write a check to Kendall County for the difference. Kendall County also keeps all savings above expectations.

Will the project be competitively bid?

Yes.

Will this raise my taxes?

No. The cost of the project will be paid for by the "guaranteed savings" created by reducing utility costs, lower fleet fuel costs, and lower maintenance.
FREQUENTLY ASKED QUESTIONS

Will this lower the county’s operating cost moving forward?
Yes. Total guaranteed savings is $168,842.

What are the projected annual savings per year?

When will the work take place?
The beginning of April to ensure completion before summer heat arrives.

When will final approval to move forward be given to the board?
During the February board meeting.

What state law governs “performance contracting?”
The Illinois General Assembly enacted 50 ILCS 515/1 which establishes the basis for energy efficiency in state and local government buildings. This bill authorizes guaranteed energy savings performance contracting.

Will this project lower Kendall County’s Carbon Footprint?
Yes. It will remove 513 tons of CO2. That’s like removing 152 cars or planting 1127 trees.
