Re: Notification Required under 220 ILCS 5/8-505.1

Dear Chairman:

ComEd intends to perform vegetation management activities on distribution circuits in unincorporated Kendall County December 2013. The vegetation management activities are a key component of ComEd’s maintenance program to ensure system electrical reliability, as vegetation contact with ComEd equipment is a leading cause of outages.

In accordance with applicable statutory requirements, ComEd is required to provide each affected municipality a map or common addresses of the area affected by the vegetation management activities. Attached to this letter is a list of affected addresses.

Please be aware that ComEd has notified any affected customers and property owners with (i) a statement of the vegetation management activities planned, (ii) the address of a website and a toll free telephone number at which a written disclosure of all dispute resolution opportunities and processes, rights, and remedies provided by the electric public utility may be obtained, (iii) a statement that the customer and the property owner may appeal the planned vegetation management activities through the electric public utility and the Illinois Commerce Commission, (iv) a toll-free telephone number through which communication may be had with a representative of the electric public utility regarding the vegetation management activities, and (v) the telephone number of the Consumer Affairs Officer of the Illinois Commerce Commission. The notice also stated that circuit maps or common addresses of the area to be affected by the vegetation management activities are on file with the local municipal or county office. A sample copy of this notice is also included with this letter.

We recognize that our vegetation management activities sometimes create concern by your residents because trees near our electrical wires are significantly trimmed or sometimes require removal. Qualified line-clearance workers contracted by ComEd will
be performing the tree pruning work. Supervisors and General Foremen will be in close contact with the crews, ensuring that the work is performed properly. Additionally, we are strong advocates of proactive efforts to ensure that only appropriate vegetation is planted near our facilities, and our easement and leases usually specify vegetation restrictions. Trees that grow greater than 20 feet, for example maple, elm and blue spruce, should never be planted under or near distribution power lines. At full height, these trees could contact lines and cause a power outage or create a safety issue. On the other hand, trees and bushes that grow to heights less than 20 feet, for example dogwoods or crabapples, can often be planted near distribution power lines. For more information about vegetation maintenance along power lines and ComEd’s “Right Tree, Right Place” program, please visit:
http://www.comed.com/sites/customerservice/Pages/TreesPowerlines.aspx

Please contact me at 630.691.4395 or via e-mail at kevin.jury@comed.com if you have any questions.

Sincerely,

Kevin M. Jury, Certified Arborist/Utility Specialist
ComEd
